Speed of Decision

Fastest finger first! Those who decide first are always at an advantage. Quickest and accurate decision is the most rewarding, while late decision promotes procrastination. It delays the process of development and invites loss. 'Speed of decision' is required in times of need and crisis.

To arrive at a decision, we need to learn about the subject we have to decide. Taking a decision becomes easy and less time consuming if, somehow, we reduce the learning time. We can achieve this through continuous learning.

Becoming proactive and anticipating upcoming complex decisions also helps us to reduce the decision time. People with knowledge in the relevant field can speed up our decision making. We must take their help in making a quicker decision.

Speed of decision making is of utmost importance to be at the top!
